DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 21-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Darrow (US Patent 2,026,082) in view of Norris (US Patent 4,162,073).

Darrow teaches most of the elements of the disclosed invention, including a playing board (fig.1), pictorial representations (fig.1), marked action spaces and event spaces (fig.1), a set of operation papers (fig.8), a set of event cards (fig. 6), a plurality of different icon pieces (fig.2), play money (fig.11) and rules (co.. 8, par. 1). However, Darrow fails to teach historical markings of Egyptian symbols and structures and at least one die having six major facets. It is well known to use various shapes and color of dies and different event cards with a board game; therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use a die having color and six major facets and event cards with the board game of Darrow for the purpose of providing amusement and learning when playing with the board game.

At the time the invention was made, it would have been an obvious matter of design choice to persons of ordinary skill in the art to have the game board of Darrow octagonal because Applicant has not disclosed that octagonal board provides an advantage, is used for a particular purpose, or solves a stated problem. Therefore, it

Art Unit: 3725

would have been prima facie obvious to modify the board of Darrow to obtain the invention specified in claim 21 because such modification would have been considered a mere design consideration which fails to patentably distinguish over the prior art of Darwin.

Norris teaches in the figures a board game having a plurality of objects, a plurality of monetary reward indicators and a pyramidal random choice means. The indicia on the board relates to the temple position and gold that can be collected by the player. It would have been obvious to one having ordinary skill at the time the invention was made to incorporate historical markings of Egyptian symbols an structures as taught by Norris for the board game of Darrow for the purpose of providing an amusement game which utilizes such alleged inherent pyramid powers.

Response to Arguments

Applicant's arguments filed 06/07/05 have been fully considered but they are not persuasive. The arguments provided by Applicant are germane to the rejection set forth above. Therefore, Applicant's attention is directed to the above Detailed Office Action.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3725

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bena Miller whose telephone number is 571.272.4427.

The examiner can normally be reached on Monday-Friday.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
